How Penguins Stay Warm

Penguins are birds that cannot fly. They swim very well in cold water. A thick layer of feathers keeps a penguin warm. A layer of fat helps too. Penguins also huddle together on cold days. They stand close to share their warmth. The penguins on the outside take turns moving to the middle. Then no penguin gets too cold.

1. Which question does this text answer?

   How fast can penguins swim?

   What color are penguin eggs?

   How do penguins stay warm?

2. What do penguins do together on cold days? Use the text.

   Dig holes in the snow Huddle close Fly south

3. Which sentence is NOT true, by this text?

   Penguins live in hot deserts.

   Penguins also huddle together on cold days.

   A layer of fat helps too.

4. Who moves to the middle of the huddle? Use the text.

   The biggest penguins

   The oldest penguins

   The penguins on the outside

5. In this text, what does "huddle" mean?

   to stand close together to jump high to run away

6. What does this text help you learn about?

how penguins stay warm

how penguins huddle

how penguins play in the snow
