How a Frog Grows

A frog starts life as an egg. The mother lays her eggs in a pond. A tiny tadpole hatches from each egg. Tadpoles stay in the water. They breathe through gills, like fish. Tadpoles have tails and swim. Soon they grow legs. Their tails get shorter. Tadpoles hide in the weeds. Big fish cannot see them there. At last, they hop out of the water as little frogs.

1. Which question does this text answer?

   Where do frogs go in winter?

   How far can a frog jump?

   How does a frog grow?

2. Where does the mother frog lay her eggs? Use the text.

   On the grass Under a rock In a pond

3. Which sentence is NOT true, by this text?

   Soon they grow legs.

   Tadpoles have tails and swim.

   The mother lays her eggs on the grass.

4. How do tadpoles breathe? Use the text.

   With their legs With big ears Through gills

5. In this text, what does "tadpole" mean?

   a baby frog that lives in water

   a small pond plant

   a kind of fish

6. What does this text help you learn about?

   how a tadpole swims how a frog grows what a frog likes to play

7. What do tadpoles grow after a while? Use the text.

Shells Fur Legs

8. Which fact is in this text?

The mother lays her eggs on the grass.

Tadpoles live in trees.

Tadpoles have tails and swim.

9. Which title tells what you learn from this text?

Animals That Live in Water How a Frog Grows Frog Eggs in a Pond

10. Which question can you NOT answer with this text?

How do tadpoles breathe?

Where does the mother frog lay her eggs?

How far can a frog jump?
