A Sea Turtle's Start

A mother sea turtle comes to the beach at night. She digs a hole in the sand and lays her eggs. Then she covers the eggs and goes back to the sea. The sand keeps the eggs warm and safe. After many weeks, the baby turtles hatch. They crawl toward the water. Many dangers wait on the sand. The babies must hurry. Once they reach the sea, they swim far away.

1. Which question does this text answer?

   How long do sea turtles live?

   How big is a sea turtle's shell?

   How does a sea turtle's life begin?

2. Where does the mother turtle lay her eggs? Use the text.
