## How a Frog Grows

A frog starts life as an egg. The mother lays her eggs in a pond. A tiny tadpole hatches from each egg. Tadpoles stay in the water. They breathe through gills, like fish. Tadpoles have tails and swim. Soon they grow legs. Their tails get shorter. Tadpoles hide in the weeds. Big fish cannot see them there. At last, they hop out of the water as little frogs.

1. What is this text mostly about?

   where a frog lays eggs  how a frog grows  what a frog likes to play

2. Which sentence is a key detail from this text?

   Tadpoles never grow legs.

   Tadpoles live in trees.

   The mother lays her eggs in a pond.

3. Which sentence is NOT in this text?

   Tadpoles live in trees.

   The mother lays her eggs in a pond.

   Soon they grow legs.

4. Which title fits the whole text best?

   Where a Frog Lays Eggs  How a Frog Grows  Animals That Live in Water

5. Which sentence gives another key detail?

   Tadpoles live in trees.

   The mother lays her eggs on the grass.

   Tadpoles have tails and swim.

6. Which title is too small for the whole text?

   How a Frog Grows  Animals That Live in Water  Frog Eggs in a Pond

7. Which title is too big for this text?

Animals That Live in Water  How a Frog Grows  How a Tadpole Swims

8. Which sentence tells more about how a frog grows?

Soon they grow legs.

The mother lays her eggs on the grass.

Tadpoles never grow legs.

9. Which question does this text answer?

How does a frog grow?

Where do frogs go in winter?

How far can a frog jump?

10. What does the word "tadpole" mean in this text?

a kind of fish

a small pond plant

a baby frog that lives in water
