Ants Work Together

Ants live in big groups called colonies. Every ant has a job. Some ants look for food and carry it back to share. Other ants stay inside to care for the baby ants. The babies are too small to take care of themselves. Some ants guard the home from danger. Ants have six legs. The colony stays strong because every ant does its part.

1. What is this text mostly about?

   ants that look for food ants that guard the home how ants work together
