How Rain Is Made

Rain begins as water in lakes, rivers, and the sea. The sun warms the water. Some of it rises into the air as a gas you cannot see. High in the sky, the air is cold. The gas turns back into tiny drops of water. The drops make clouds. When the drops get big, they fall as rain. Big drops are too heavy to stay in the sky. The rain fills the lakes and rivers again.

1. What is this text mostly about?

   how clouds form how rain is made what the sun does to water

   why thunder is loud

2. Which sentence is a key detail from this text?

   The sun warms the water.

   Clouds are made of smoke.

   The sun freezes the water.

   Rain begins in the clouds only.

3. Which sentence is NOT in this text?

   The rain fills the lakes and rivers again.

   Rain begins in the clouds only.

   The drops make clouds.

   The sun warms the water.

4. Which title fits the whole text best?

   How Clouds Form How Rain Is Made All About Weather

5. Which sentence gives another key detail?

Clouds are made of smoke.

The sun freezes the water.

The drops make clouds.

Rain begins in the clouds only.

6. Which title is too small for the whole text?

The Sun Warms Water All About Weather How Rain Is Made

7. Which title is too big for this text?

How Rain Is Made All About Weather What the Sun Does to Water

8. Which sentence tells more about how rain is made?

Clouds are made of smoke.

Rain begins in the clouds only.

The sun freezes the water.

The rain fills the lakes and rivers again.

9. Which question does this text answer?

How cold is snow? Why is the sky blue? How is rain made?

10. What does the word "rises" mean in this text?

goes up stays still falls down
