Shadows All Day

A shadow forms when something blocks the light. In the morning, the sun is low in the sky. Shadows are long. At noon, the sun is high above you. Shadows are short. In the evening, the sun gets low again. Shadows grow long again. A shadow changes size all day because the sun seems to move.

1. What is this text mostly about?
   - why the sun is hot
   - how shadows change during the day
   - shadows at noon

2. Which sentence is a key detail from this text?
