Pollination and Seed Dispersal

Grade 2 Science Worksheet

Name _____ Date _____

Circle the answer.

1. A bird eats red berries and drops the seeds on the other side of the field. What is this helping the plant do?

   help the plant make seeds

   grow many more flowers this year

   spread its seeds to a new place

2. Why do burrs have tiny hooks?

   to stick to fur and travel

   to help the plant drink more water

   to make the seed taste sweet and juicy

3. Which seed will stick to an animal's fur best?

   a heavy smooth seed a seed with fluffy parts a seed with tiny hooks

4. Burr plants grow along a dog's walking path. What best explains this?

   The dog made the pollen for the plants.

   Burr plants grow only along dirt paths in the park.

   Seeds stuck to the dog's fur and fell off.

READ THIS FIRST

Garden observation

A bee visited two flowers. Yellow pollen stuck to its body at the first flower and rubbed onto the second flower. Later, a burr with seeds hooked onto a dog's fur and traveled away from the plant.

5. Which observation shows pollination?

   A burr hooked onto the dog's fur.

   The dog traveled away from the plant.

   Pollen rubbed onto the second flower.
