Water on Earth

Grade 2 Science Worksheet

Name _____ Date _____

Circle the answer.

1. Which list has only places that hold fresh water?

   lake, ocean, glacier lake, river, glacier glacier, ocean, river

2. What is a river?

   tiny drops of water in the sky

   a huge sheet of ice on the land

   fresh water that flows along the land

3. On a globe, a white area near the top and bottom often shows what?

   sand ice and snow a lake

4. Which water is fresh, not salty?

   a salty sea near the coast a mountain lake the big ocean

5. Where is frozen water found at the top of a snowy mountain?

   rivers and lakes clouds and fog glaciers and snow

READ THIS FIRST

Water survey notes

The ocean sample tasted salty. The lake sample was fresh water. Both samples were liquid water. Snow on the nearby mountain was frozen water.

6. Which observation identifies water in its solid form?

   snow on the mountain the salty taste the ocean sample

7. Which list has only liquid water?

   lake, river, ice cap river, snow, groundwater lake, river, groundwater

8. What is a lake?

water with land all around it

a stream that flows to the sea

a huge area of deep salt water

9. A globe has more blue than green or brown. What does this show?

Earth has no ice.

Earth has more land than water.

Earth has more water than land.

10. What kind of water fills the ocean?

salt water frozen water groundwater
