From Seed to Pumpkin

Pumpkins take a long time to grow. A farmer has to follow the steps in the right order.

First, the farmer plants pumpkin seeds in late spring. The soil must be warm, or the seeds will not sprout. Each seed goes about one inch deep.

Next, small green shoots push up through the soil. In about a week, two leaves open. Soon the plant grows long vines that creep across the ground.

After that, bright yellow flowers bloom on the vines. Bees fly from flower to flower. They carry pollen, and this helps tiny pumpkins start to form.

Then the pumpkins grow bigger and bigger. They begin green and slowly turn orange. This takes about three months.

Finally, the farmer cuts the pumpkins from the vines in the fall. Some go to stores. Others are sold at the farm. Growing pumpkins takes patience, but it is worth the wait. Now you know how a pumpkin grows from one small seed.

1. What is the author's main purpose for writing this text?

   to inform readers how a pumpkin grows

   to entertain readers with a farm story

   to persuade readers to buy pumpkins

2. How is this text organized?

   compare and contrast

   sequence, or steps in time order

   problem and solution

3. Which words are clues to how this text is organized?

   Because, So, As a result

   Alike, Different, Both

   First, Next, After that, Finally

4. What happens right after the yellow flowers bloom?

Bees carry pollen from flower to flower.

The farmer plants the seeds.

Small green shoots push up.

5. Which sentence states the author's purpose most directly?

Bees fly from flower to flower.

Now you know how a pumpkin grows from one small seed.

They begin green and slowly turn orange.

6. Why must the soil be warm when the seeds are planted?

so the bees find the flowers

so the seeds will sprout

so the pumpkins turn orange

7. The vines creep across the ground. What does creep mean?

break into pieces jump up high move slowly and low

8. Which paragraph tells what bees do?

the second paragraph the last paragraph the fourth paragraph

9. Which sentence shows the author's own point of view?

Others are sold at the farm.

The soil must be warm, or the seeds will not sprout.

Growing pumpkins takes patience, but it is worth the wait.

10. Why does the author use words like First and Next?

to show readers which pumpkin is the biggest

to help readers follow the steps

to make readers laugh at the busy farmer
