Climate and Weather Hazards

Answer Key - Grade 3 Science Worksheet - Building Confidence

Circle the answer.

1. The graph shows the high temperature for four days. Which hazard do these temperatures warn about?

a blizzard **a heat wave** a flood

2. Which design helps keep a town safe from river floods?

a snow fence by a road a lightning rod on a roof **a levee along the river**

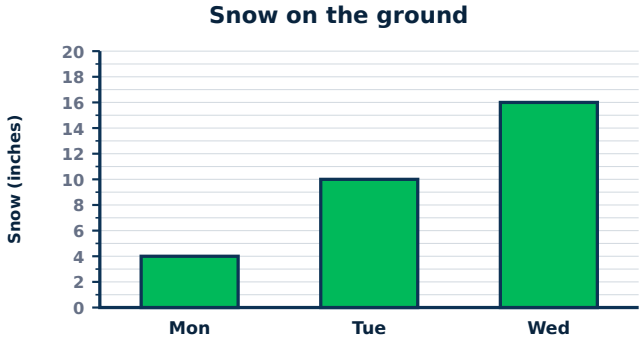

3. What does a lightning rod do?

stops rain from falling
carries lightning safely into the ground
makes thunder quieter

4. A tornado is coming. Which place is built to keep people safe?

a storm shelter or basement
a room with big windows
an open field outside

5. The graph shows the snow on the ground for three days. Which hazard do these numbers show?

a heat wave a drought **heavy snow**

6. Why do people in hurricane areas put shutters over their windows?

to keep the house cool in winter
to let more light in
to keep strong wind from breaking the glass

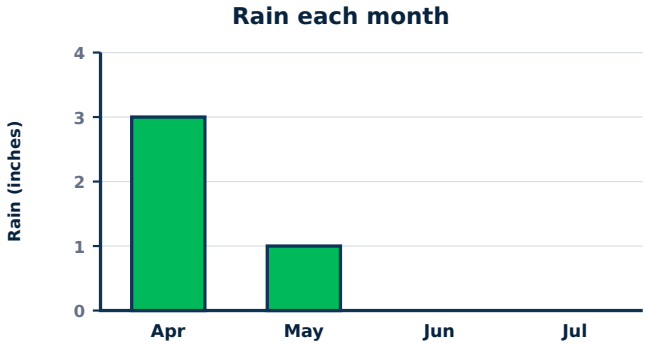

7. Why do weather scientists send warnings before a big storm?

so people have time to get ready

so the storm will turn away

so the storm will be smaller

8. The graph shows the rain each month. What hazard could these months lead to?

a blizzard a drought a flood

9. A town gets very little rain in summer. Which design helps it have water then?

a lightning rod on a tower

a sea wall on the beach

a tank that stores rainwater

10. Which design helps houses near a river stay dry in a flood?

painting the houses white

building the houses up on stilts

adding bigger windows
