Climate and Weather Hazards

Grade 3 Science Worksheet - Building Confidence

Name _____ Date _____

Circle the answer.

1. The graph shows the rain each month. What hazard could these months lead to?

a flood a drought a blizzard

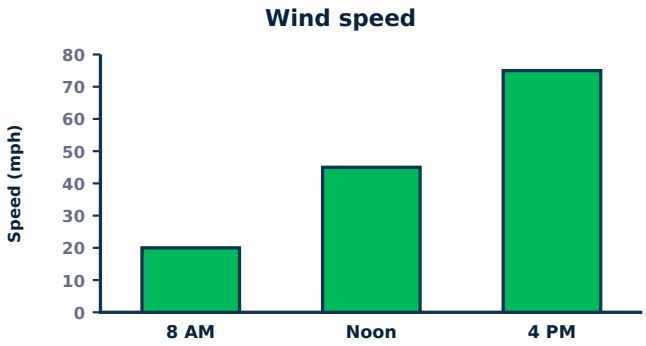

2. A town gets very little rain in summer. Which design helps it have water then?
a sea wall on the beach
a lightning rod on a tower
a tank that stores rainwater

3. Which design helps houses near a river stay dry in a flood?
painting the houses white
adding bigger windows
building the houses up on stilts

4. Rows of trees are planted beside a field to block strong wind. What is this design called?
a levee a windbreak a storm drain

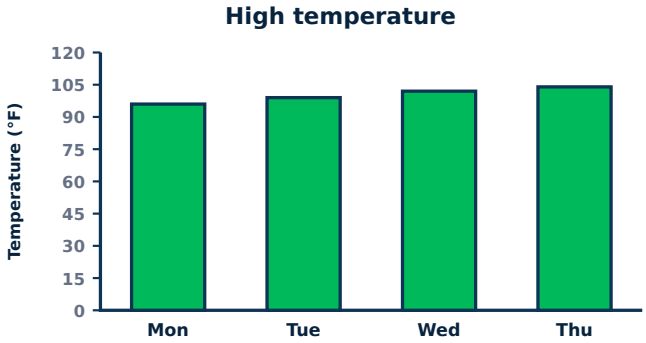

5. In a heat wave, a city opens cool buildings where people can rest. What problem does this solve?
keeping streets from flooding
keeping snow off the roads
keeping people safe from extreme heat

6. The graph shows the wind speed during one day. What hazard is getting closer?

a strong windstorm a heat wave a drought

7. The graph shows the high temperature for four days. Which hazard do these temperatures warn about?

a flood a heat wave a blizzard

8. Which design helps keep a town safe from river floods?
a lightning rod on a roof a snow fence by a road a levee along the river

9. What does a lightning rod do?
stops rain from falling
carries lightning safely into the ground
makes thunder quieter

10. A tornado is coming. Which place is built to keep people safe?
an open field outside
a storm shelter or basement
a room with big windows

Climate and Weather Hazards

Answer Key - Grade 3 Science Worksheet - Building Confidence

Circle the answer.

1. The graph shows the rain each month. What hazard could these months lead to?

a flood (a drought) a blizzard

2. A town gets very little rain in summer. Which design helps it have water then?

a sea wall on the beach

a lightning rod on a tower

(a tank that stores rainwater)

3. Which design helps houses near a river stay dry in a flood?

painting the houses white

adding bigger windows

(building the houses up on stilts)

4. Rows of trees are planted beside a field to block strong wind. What is this design called?

a levee (a windbreak) a storm drain

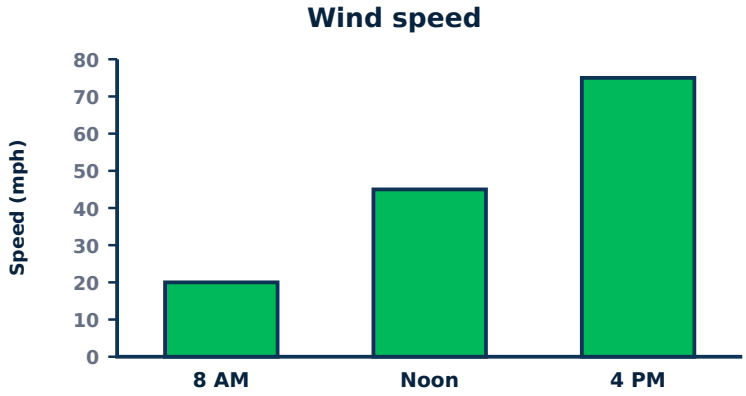

5. In a heat wave, a city opens cool buildings where people can rest. What problem does this solve?

keeping streets from flooding

keeping snow off the roads

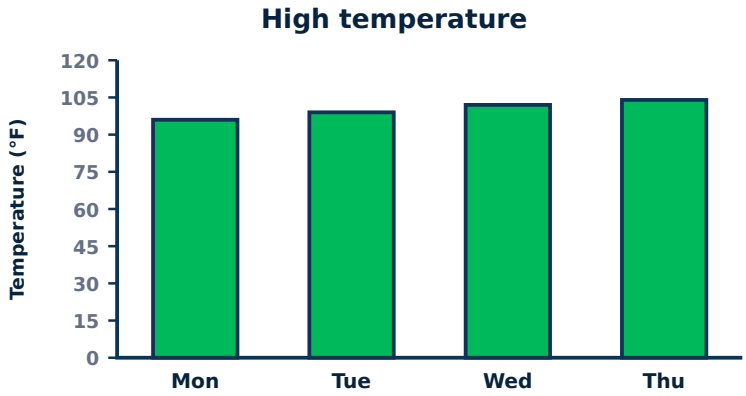

(keeping people safe from extreme heat)

6. The graph shows the wind speed during one day. What hazard is getting closer?

a strong windstorm a heat wave a drought

7. The graph shows the high temperature for four days. Which hazard do these temperatures warn about?

a flood a heat wave a blizzard

8. Which design helps keep a town safe from river floods?

a lightning rod on a roof a snow fence by a road a levee along the river

9. What does a lightning rod do?

stops rain from falling

carries lightning safely into the ground

makes thunder quieter

10. A tornado is coming. Which place is built to keep people safe?

an open field outside

a storm shelter or basement

a room with big windows
