Climate and Weather Hazards

Grade 3 Science Worksheet - Building Confidence

Name _____ Date _____

Circle the answer.

1. The graph shows the snow on the ground for three days. Which hazard do these numbers show?

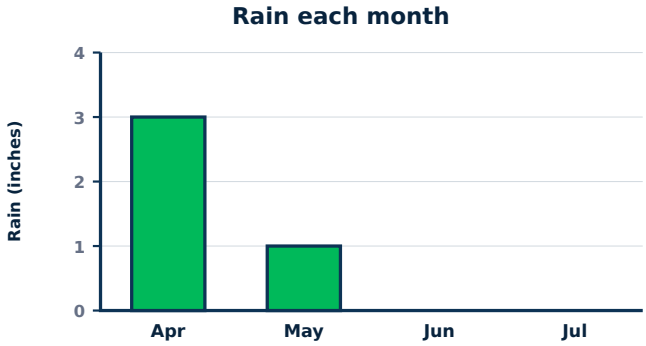

heavy snow a drought a heat wave

2. Why do people in hurricane areas put shutters over their windows?
   to let more light in
   to keep strong wind from breaking the glass
   to keep the house cool in winter

3. Why do weather scientists send warnings before a big storm?
   so the storm will be smaller
   so the storm will turn away
   so people have time to get ready

4. The graph shows the rain each month. What hazard could these months lead to?

a drought a flood a blizzard

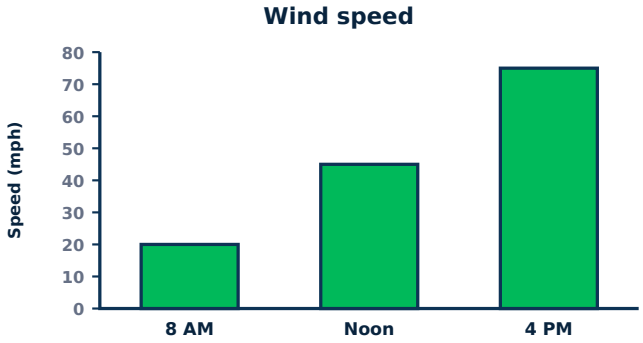

5. A town gets very little rain in summer. Which design helps it have water then?
   a tank that stores rainwater
   a lightning rod on a tower
   a sea wall on the beach

6. Which design helps houses near a river stay dry in a flood?
   painting the houses white
   building the houses up on stilts
   adding bigger windows

7. Rows of trees are planted beside a field to block strong wind. What is this design called?
   a storm drain a levee a windbreak

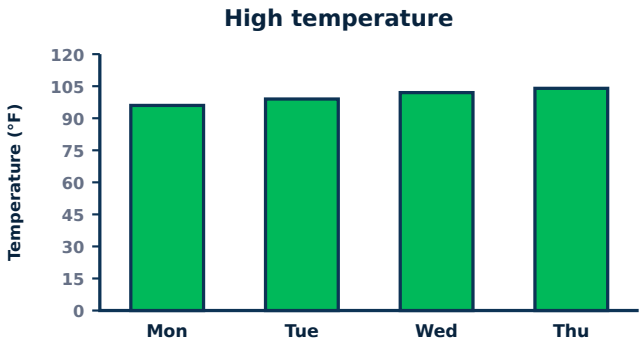

8. In a heat wave, a city opens cool buildings where people can rest. What problem does this solve?
   keeping streets from flooding
   keeping people safe from extreme heat
   keeping snow off the roads

9. The graph shows the wind speed during one day. What hazard is getting closer?

   a strong windstorm a drought a heat wave

10. The graph shows the high temperature for four days. Which hazard do these temperatures warn about?

   a blizzard a flood a heat wave
