# Climate and Weather Hazards

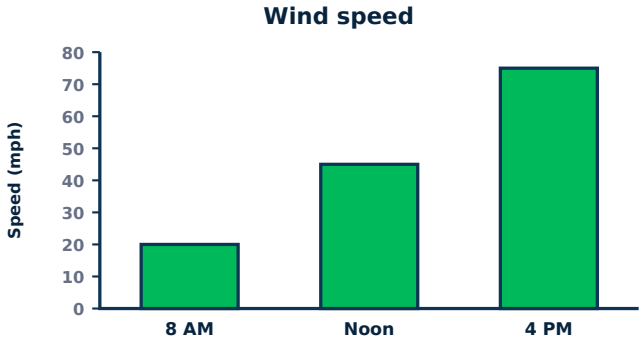

Grade 3 Science Worksheet - Building Confidence

Name _____ Date _____

Circle the answer.

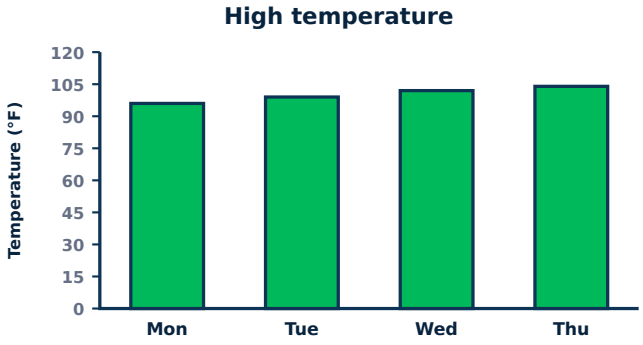

1. In a heat wave, a city opens cool buildings where people can rest. What problem does this solve?
   keeping people safe from extreme heat
   keeping snow off the roads
   keeping streets from flooding

2. The graph shows the wind speed during one day. What hazard is getting closer?

   a heat wave  a strong windstorm  a drought

3. The graph shows the high temperature for four days. Which hazard do these temperatures warn about?

   a blizzard  a heat wave  a flood

4. Which design helps keep a town safe from river floods?
   a snow fence by a road  a levee along the river  a lightning rod on a roof

5. What does a lightning rod do?
   stops rain from falling
   makes thunder quieter
   carries lightning safely into the ground

6. A tornado is coming. Which place is built to keep people safe?
   an open field outside
   a room with big windows
   a storm shelter or basement

7. The graph shows the snow on the ground for three days. Which hazard do these numbers show?

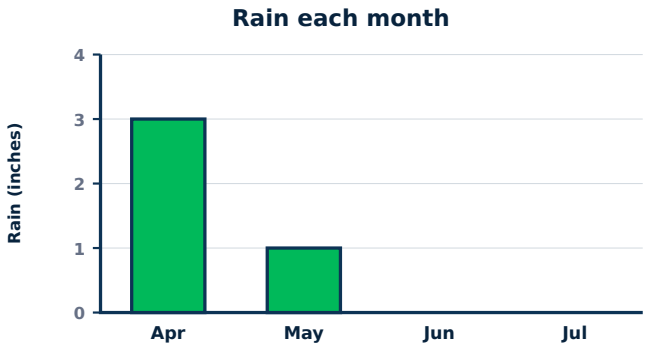

heavy snow  a drought  a heat wave

8. Why do people in hurricane areas put shutters over their windows?
to keep strong wind from breaking the glass
to keep the house cool in winter
to let more light in

9. Why do weather scientists send warnings before a big storm?
so the storm will be smaller
so people have time to get ready
so the storm will turn away

10. The graph shows the rain each month. What hazard could these months lead to?

a blizzard  a drought  a flood
