Two Texts About Penguins

Text 1: Emperor penguins live in Antarctica, the coldest place on Earth. Winter winds there are fierce and icy. To stay warm, emperor penguins huddle close in a big group. They take turns standing in the warm middle. Huddling saves energy during the long, dark winter. Their chicks hatch in the middle of winter. Emperors are the tallest penguins. They can stand almost four feet tall. A thick layer of fat under their feathers also keeps out the cold.

Text 2: Galapagos penguins live near the equator, where the sun is hot. They live on rocky islands and are one of the smallest penguins. They stand only about twenty inches tall. To stay cool, they swim in the chilly ocean. On land, they hold their flippers out to let heat escape. They also rest in the shade of rocks. They find their food in the cool water nearby. Like all penguins, they cannot fly, but they are fast swimmers.

1. What topic do both texts share?

   penguins Antarctica the equator

2. Which text says penguins cannot fly?

   Text 1 Text 2 both texts

3. Which detail is only in Text 1?

   The penguins take turns in the warm middle.

   The penguins rest in the shade of rocks.

   The penguins hold their flippers out.

4. Which detail is only in Text 2?

   These penguins have a thick layer of fat.

   These penguins huddle in a big group.

   These penguins are about twenty inches tall.

5. Text 1 says emperors huddle to stay warm. What does Text 2 say Galapagos penguins do on land to stay cool?

   huddle in a big group hold their flippers out swim in the chilly ocean

6. Which text tells about the tallest penguins?

Text 1 Text 2 both texts

7. How are the two kinds of penguins alike?

Both stand almost four feet tall.

Both have ways to handle their weather.

Both live near the hot equator.

8. What does "huddle" mean in "emperor penguins huddle close in a big group"?

crowd close together swim far apart dig into the snow

9. Which detail is NOT in either text?

Penguins rest in the shade of rocks.

Penguins travel north each spring.

Penguins stand close in a group.

10. Why do the two kinds of penguins do such different things?

One is a fast swimmer, and one cannot swim.

One lives where it is cold, and one where it is hot.

One has feathers, and one has a layer of fat.
