Angles, Lines, and Rays

Grade 4 Math Worksheet

Name _____ Date _____

Circle the name that matches each description.

1. Two lines stay the same distance apart and never meet.

   perpendicular lines right angles crossing rays parallel lines

2. It goes on forever in both directions.

   ray angle line segment line

3. Two lines cross and make square corners.

   line segments rays perpendicular lines parallel lines

4. It has two endpoints.

   line segment angle ray line

5. It is made of two rays that share an endpoint.

   pair of parallel lines line segment line angle

Angles, Lines, and Rays

Answer Key - Grade 4 Math Worksheet

Circle the name that matches each description.

1. Two lines stay the same distance apart and never meet.

   perpendicular lines right angles crossing rays **parallel lines**

2. It goes on forever in both directions.

   ray angle line segment **line**

3. Two lines cross and make square corners.

   line segments rays **perpendicular lines** parallel lines

4. It has two endpoints.

   line segment angle ray line

5. It is made of two rays that share an endpoint.

   pair of parallel lines line segment line **angle**
