Angles, Lines, and Rays

Grade 4 Math Worksheet - Challenge Me

Name _____ Date _____

Circle the name that matches each description.

1. Two lines that never meet, however far they go.

   rays angles perpendicular lines parallel lines

2. The shared endpoint of the two rays of an angle.

   vertex ray segment side

3. An angle that is exactly a quarter of a full turn.

   right angle obtuse angle straight angle acute angle

4. An angle that makes a straight line.

   straight angle obtuse angle right angle acute angle

5. Lines that meet at a right angle.

   parallel lines line segments perpendicular lines rays

Angles, Lines, and Rays

Answer Key - Grade 4 Math Worksheet - Challenge Me

Circle the name that matches each description.

1. Two lines that never meet, however far they go.

   rays angles perpendicular lines **parallel lines**

2. The shared endpoint of the two rays of an angle.

   vertex ray segment side

3. An angle that is exactly a quarter of a full turn.

   right angle obtuse angle straight angle acute angle

4. An angle that makes a straight line.

   straight angle obtuse angle right angle acute angle

5. Lines that meet at a right angle.

   parallel lines line segments **perpendicular lines** rays
