## Mumbai's Lunchbox Carriers

Every weekday in Mumbai, India, about 5,000 workers called dabbawalas deliver lunch. Together, they carry around 200,000 metal lunchboxes from homes to offices across the busy city.

Each morning, a family cooks a hot lunch and packs it in a round tin box. A dabbawala picks it up by bicycle before 9:30. He brings the boxes to a train station. There, workers sort hundreds of boxes into groups by where they are going. The boxes ride the trains into the city. Then other dabbawalas carry them on carts or on their heads to each office. One worker may carry dozens of boxes on a long wooden crate. Each box must reach its office before lunchtime. After lunch, the empty boxes travel all the way back home.

Most dabbawalas do not use phones or computers to track the boxes. Instead, each lid is painted with a short code of colors, numbers and letters. The code tells which station, which building and which floor the box needs.

The system is more than a hundred years old. Visitors from big companies have come to study it. Some reports say the dabbawalas almost never lose a box. They keep working even in heavy monsoon rain, when streets fill with water.

For many families, the lunchbox is more than a meal. It is a small taste of home in the middle of a long workday.

1. Which detail best shows that the boxes travel in more than one way?
   Boxes go by bicycle, by train and by cart.
   Workers sort hundreds of boxes into groups by place.
   Each lid is painted with a short code.

2. Which detail best shows that the work does not end when lunch is delivered?
   After lunch, the empty boxes travel all the way back home.
   Workers sort hundreds of boxes at the station.
   Visitors from big companies come to study the system.

3. Which detail best shows that the dabbawalas must be quick in the morning?
   Each lid is painted with a short code of colors.
   The boxes ride the trains into the city.
   A dabbawala picks up each box before 9:30.

4. Which detail best shows that the dabbawalas can find each box without computers?
   Families pack hot lunches in round tin boxes each morning.
   A painted code on each lid tells where it goes.
   Workers carry the boxes on carts or on their heads.
