Natural Hazards

Grade 4 Science Worksheet - Challenge Me

Name _____ Date _____

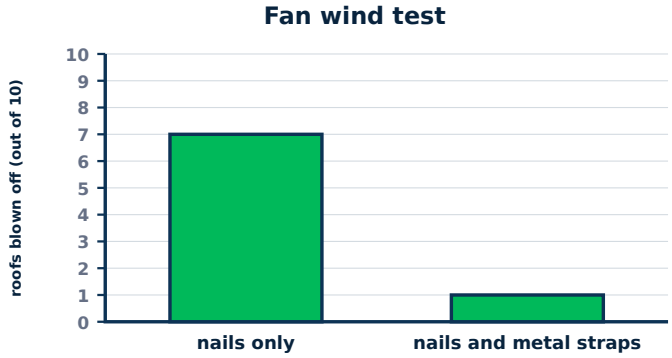

Circle the answer.

1. Lava flows down a volcano toward a farm. What harm can it cause?
   It can blow the barns over with wind.
   It can burn and bury the fields and barns.
   It can freeze the crops in the fields.
   It can pull the farm out to sea.

2. Which plan would protect the most people at a beach town if a tsunami comes?
   build a playground right by the shore
   mark routes to high ground and practice them
   put more lifeguards on the beach
   tell people to wait inside beach houses

3. What causes most tsunamis?
   a large ship moving very fast
   a strong wind over the ocean
   an earthquake under the ocean floor
   a full moon pulling on the water

4. Students blew a fan at 10 model houses with each roof type. What does the data show?

   Nails alone kept more roofs on.
   Straps kept 7 more roofs on.
   Straps kept 6 more roofs on.
   Both roofs did about the same.
