Paraphrase a Source

Grade 4 Writing Worksheet - Challenge Me

Name _____ Date _____

Read each source. Circle the choice that adds an opinion.

1. Source: "The Moon does not make its own light. It shines because it reflects sunlight." Which choice adds an opinion the source does not give?
   - The Moon has no light of its own. Its beautiful glow is only sunlight bouncing off its surface.
   - No light is made by the Moon itself. It looks bright because sunlight bounces off it.
   - The Moon cannot make light by itself. What we see is sunlight that reflects off it.
   - Sunlight bouncing off the Moon is the only reason it shines, since it makes no light of its own.

2. Source: "Cheetahs are the fastest land animals. They can sprint at more than sixty miles per hour, but only for a short distance." Which choice adds an opinion the source does not give?
   - Cheetahs are the fastest land animals, which is so impressive. They can run over sixty miles an hour, but only for a short way.
   - On land, the cheetah is the speediest animal. It can reach more than sixty miles an hour, though only for a brief stretch.
   - A cheetah is faster than any other animal on land. It sprints past sixty miles an hour, but it cannot keep that speed up for long.
   - No other land animal runs faster than a cheetah does. For a short distance, it can sprint at over sixty miles per hour.

3. Source: "Sunflowers turn their faces to follow the sun across the sky. This helps young plants get more light." Which choice adds an opinion the source does not give?
   - As the sun moves across the sky, sunflowers turn their faces to follow it, which lets young plants catch more light.
   - Sunflowers turn to face the sun as it moves across the sky. Doing this gives the young plants extra light to use.
   - Sunflowers follow the sun across the sky, which is a charming habit. This helps young plants get more light.
   - A sunflower follows the sun across the sky by turning its face. This gives young plants more light.

4. Source: "Dragonflies spend their early lives underwater. Later they climb out and grow wings." Which choice adds an opinion the source does not give?
   - A dragonfly's early life is spent in the water. After that, it crawls out of the water and develops wings.
   - Young dragonflies live underwater. When they are older, they climb out of the water and grow wings.
   - Dragonflies start out underwater. Later they climb out and grow wings, becoming gorgeous insects.
   - Before they have wings, dragonflies live in the water. They leave the water and grow wings later on.
